

Mission Statement

The Bolsover School will provide a stimulating learning environment in which all learners can succeed and reach their potential. The school has high expectations of all who work and learn here. The school will ensure that the service offered to our students is of the highest quality and through continual improvement an excellent standard of education will be provided for the community of Bolsover.

This will be achieved by:

- a broad, balanced and relevant curriculum which promotes a full range of learning, thinking and life skills;
- Flexible and responsive teaching strategies and learning styles;
- all students having access to accredited courses equal to their ability;
- tracking individual learners through their school career to counteract underachievement and maximise potential;
- all employees receiving quality training based upon reflection on existing practice and analysis of need for the future;
- by working in a close partnership with the whole community, particularly parents and local employers;
- working collaboratively with other schools and providers to extend the range and increase the quality of educational provision within the community served by The Bolsover School.

Our success will ensure that when students leave the school their potential has been reached and they are confident, enterprising citizens who are able to meet the challenges of a changing society.
